

2.0 RMG – CALBE BRUSAROSCO Division– Quality Policy

The Quality System, certified according to the ISO 9000 standards and integrated with the requirements of the IATF16949:2016 standard, constitutes a strong point for the company's success.

RMG – Calbe Brusarosco Quality Policy

With an efficient system of application and a constant process of improvement, Brusarosco operates to establish the highest standard of quality, value and service.

The tools that allow us to achieve our objective depend on:

- the care with which we supply products that regularly and constantly satisfy our customers' and regulatory requirements;
- the improvement and development of processes for the purpose of reducing waste and preventing problems;
- the establishment of proactive cooperation between our customers and our work team in order to supply a product that reflects the customers' needs as closely as possible;
- the motivation and awareness of the employees who play a fundamental role in achieving the quality and innovation of the company;
- encouraging both in-house and external communication (bulletins, participation at conferences and trade fairs, collaboration with trade associations and the public administration).

The policy is re-examined periodically to check that the objectives are achieved and to define new targets and it is implemented in the operational policy during its review.
